OBJECTIVE

Full Stack Developer with 2 years of experience in designing, developing, and implementing scalable web applications using modern technologies. Proficient in both front-end and back-end development, including HTML, CSS, JavaScript, and popular frameworks such as React and Node.js. Strong analytical and problem-solving skills, with a keen eye for detail and an ability to rapidly learn and adapt to new technologies. Excellent communication and teamwork abilities, contributing to efficient project management and successful software solutions.

WORK EXPERIENCE

FullStack Developer (Internship with Stipend) 2022-2023
Propel Soft - BUTP Trichy

As the lead UI developer at PropelSoft, I spearheaded research efforts and the implementation of cutting-edge technologies within the realm of user interface design. Demonstrating adeptness in both conventional and innovative technologies, I have played a pivotal role in driving our company's advancement and fostering creativity. My duties encompassed in-depth exploration of the most current UI trends.

Additionally, I have made significant contributions to database architecture within service projects, and I have independently completed several PHP projects with great success.

FullStack Developer (Onsite + Remote) 2024
Kenstack Technologies- Trichy

I worked part-time both in-office and remotely as a Fullstack Developer and Tutor to balance my M.Tech studies. In the office, I tutored students in fullstack development, providing hands-on guidance and developing comprehensive lesson plans. Remotely, I developed and maintained numerous PHP projects, managing both front-end and back-end tasks. Additionally, I handled domain purchasing, hosting, and server management using tools like cPanel and FileZilla. This flexible work plan allowed me to effectively manage my classes and studies while gaining practical industry experience.
